

Low Vision Test Card

This card is to be used to help you determine the strength of magnifier a low vision person needs.

Note: The patient should use this card with the glasses which will be worn when using a magnifier – preferably general-wear multifocals. The magnification needed to read 1M print is estimated at the right.

Reading (10M)
10X/40D

Requires (8M)
8X/32D

Adequate (6M)
6x/24D

Lighting and (5M)
5x/20D

Magnification. (4M)
4X/16D

A magnifier should (3M)
3X/12D

Allow you to read your mail. (2M)
2X/8D

This print is similar to small headlines. (1.5M)
1.5X/6D

Congratulations! You are now reading small print (1M)
