About Memory Keepers Medical Discovery Team:

The mission of the Memory Keepers Medical Discovery Team is to support an environment of Team Science to conduct community-based participatory action research on dementia in Indigenous and rural communities with the aim of achieving health equity.

This study is supported by the National Institute on Aging, part of the National Institutes of Health, grant number R13AG085939. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.
